## FUNCTIONAL DESCRIPTION

### 1. Oscillator:

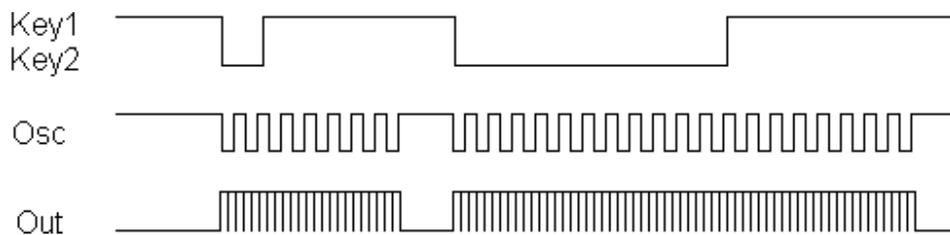

The oscillator circuit of this IC just needs an external resistor.

### 2. Envelope function:

#### (a) With Envelope:

#### (b) Without Envelope:

### 3. The relation between key and output tone:

2 input keys can trigger two sections of sounds.

(a) Key1: For bird sound output

(b) Key2: For Ding-Dong sound output and repeat this sound two times (Ding-Dong-Ding-Dong).
